

Ottawa City Soccer Club Humidex Policy for Youth Teams

Last updated June 2025

The Ottawa City Soccer Club (OCSC) uses the Environment Canada Predicted Humidex Reading when deciding if soccer will be cancelled due to high temperatures.

For **Competitive & Adult Games**, the decision to cancel games is made by the respective Leagues.

U4 to U12

On the day of your program (i.e. recreational or competitive practice or recreational game), if the humidex is predicted to be equal to or greater than 40°C three hours prior to your event, it will be cancelled. There will be no re-scheduling of programs, practices or games.

U13 to U18

On the day of your program (i.e. recreational or competitive practice or recreational game), if the humidex is predicted to be equal to or greater than 40°C three hours prior to your event, it will be cancelled. There will be no re-scheduling of any practices. Time permitting, games will be re-scheduled.

OCSC reserves the right to modify this policy for its Festivals and Tournaments.

Notification of Program Cancellation due to High Humidex

Program Coordinators will email participants regarding the cancellation three hours prior to the event. When in doubt, check your email (including Spam) and/or Environment Canada's [Weather Alerts](#) or [Local Forecasts](#) pages for more information.

At any time, if you have any concerns regarding the weather conditions, please do what you feel is best for your child.

Policy revised June 2025.
